Workers Worldwide Can Collaborate Online With a Low Cost Alternative to Microsoft Office XP

Annapolis, MD - June 18, 2002 - If you are interested in collaborating online without paying hundreds of dollars for Microsoft Office XP, WebDrive is a sound alternative for just \$39.95. WebDrive provides access to centralized online repositories where workers can collaborate on files. Not only is WebDrive significantly cheaper than Office XP, it allows collaboration using other office suites, such as Corel's Word Perfect Office and Lotus SmartSuite.

South River Technologies' Chief Technology Officer, Michael Ryan says WebDrive is a revolutionary business product that will increase productivity across many industries.

"With the proliferation of workers who telecommute and workers who travel, companies need simultaneous access to resources", said Ryan. "With WebDrive your employees can update the company's web site, collaborate on corporate presentations or sales materials all with secure access."

WebDrive is file management software that lets you quickly and easily manage files across the internet, as if they were files on your hard drive. It supports WebDAV, FTP, SFTP, SSL and MS FrontPage protocols. WebDrive uses industry standard encryption to provide secure file access.

About South River Technologies

Founded in 1996, South River Technologies develops file management software which is used for file collaboration, shared access and website management. All SRT products include strong security to provide encrypted data transfer. This unique client technology, commercially available as WebDrive®, integrates into the Windows environment, creating an instantly familiar interface for the end user, reducing training and support costs. This technology is also licensed to independent software vendors to add functionality to existing product suites. ISPs can also license re-branded versions of our products as an add-on to their service offerings.
