

South River Technologies® Signs 200th Reseller

Reseller Channel shows significant expansion in 2006

Annapolis, MD – May 30 2006 - South River Technologies (SRT) today announced it has signed the 200th company into its reseller program. The newest partner is Business Softwares & Solutions, located in Kolkata, India. Business Softwares is the first reseller for SRT in India. South River Technologies has 91 resellers in North/Central/South America, 11 in Asia, with the remainder in Europe and Australia.

Jayanta Sen, Owner of Business Softwares & Solutions, says that “South River Technologies is viewed as an expert in the line of remote file access products”. Sen feels that WebDrive will “give us the ability to integrate with our Backup and Components Solutions to the developing market of IT in India.”

Business Softwares’ primary market focus for South River Technologies products is to expand their remote file access and secure file transfer offerings to new and existing customers in the IT and Software Services sectors, along with expansion into their current IBM and Microsoft channels.

About Business Softwares & Solutions

www.bssit.net

Business Softwares & Solutions is a Software Distribution House in India, distributing all across India with a track record of highest quality and lowest distribution time. In operation since 1999 as a software distributor, they have earned the credential of working with the best Indian and MNC companies. They facilitate marketing of software, from presales consulting, to first hand support and implementation throughout India.

About South River Technologies

Founded in 1996, South River Technologies develops file management software which is used for file collaboration, shared access and website management. All SRT products include strong security to provide encrypted data transfer. This unique client technology, commercially available as WebDrive®, integrates into the Windows environment, creating an instantly familiar interface for the end user, reducing training and support costs. This technology is also licensed to independent software vendors to add functionality to existing product suites. ISPs can also license re-branded versions of our products as an add-on to their service offerings.
